Carolyn/Bhooma/Neal

Please confirm that you are OK with us identifying the Screening Levels in the tables and any associated reports as EPA Regional Screening Levels using both the carcinogenic target cancer risk of $10E-05$ and the non-carcinogenic hazard quotient of 1. If this is not acceptable, please tell me as soon as possible because I can't really finalize any tables or reports until I get this clarification. For quick reference, please see the attached draft table to see how we have them identified in table format.

Thanks

Sincerely,
